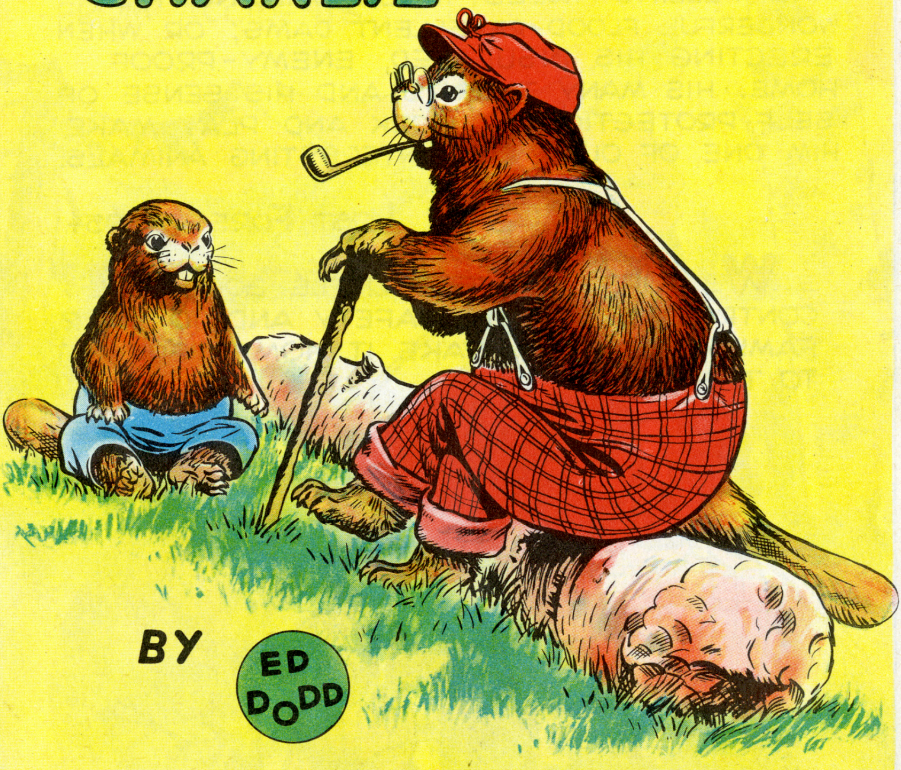
# OLD CHIPS AND CHARLIE



BY ED DODD

CREATOR OF MARK TRAIL

# Foreword

In presenting this booklet, I have chosen the beaver as a symbol of safety.

The world in which animals live is a dangerous one unless they constantly practice the rules of safety. The beaver does this to a remarkable degree. He skillfully protects himself when cutting and felling trees; when building his wonderful flood-repellent dams; or when erecting his insulated, enemy-proof home. His many talents and his sense of self-protection at work and play make him one of our most interesting animals.
